

# DECIDED POINTS

George W. Bush

## Chapter 1

This book begins when Gore lost after he had won.

But I was the winner after I had lost.

It was really great.

I couldn't wait to run the country and fix things after Clinton messed up stuff so bad.

The hardest part was leaving Texas.

But I knew I could come back so it was OK.

Plus I knew I couldn't live in Texas and be president.

So I decided we would go to Washington.

## Chapter 2

At first it was a lot of work being president.

There were lots of meetings and people asking questions.

But Dick is a great guy.

He helped me a lot to figure out about being a good president.

I decided to make sure to help Dick as he helped me become a good president.

There were still a lot of meetings but now with less questions.

There was still a lot to do.

### **Chapter 3**

One big problem was that Clinton left the government with too much money.

So I started thinking maybe we could spend more money to get a smaller government.

Also high taxes were really hurting the economy.

So we had a lot of meetings about taxes.

I decided to lowering taxes would be the right thing to do.

We also had some meetings about getting lots of oil and some more meetings about taxes.

### **Chapter 4**

I was tired.

I decided I needed a vacation.

Luckily the flight to Texas is not too long.

## **Chapter 5**

I still think about September 11.

It was an awful day.

Everyone was so sad and scared.

I was sad and scared.

I knew there was a lot to decide.

I decided that day to decide things and then make sure they stay decided.

It was probably one of the hardest things I had to decide as president.

I was done being sad and scared.

I was decided.

## **Chapter 6**

Afghanistan was an easy decision.

Osama was there.

We defeated the Taliban.

Osama got away.

But again Afghanistan was an easy decision.

## **Chapter 7**

Come to think of it, Iraq was an easy decision.

Saddam was there.

There might yet have will been weapons of mass destruction.

Also there was al Qaeda and September 11 and Iraq and democracy and stuff.

So like I said it was a pretty easy decision.

Saddam was there.

But now he's dead.

He won't ever decide anything again, that's for sure.

## **Chapter 8**

I also decided to work hard to defeat Kerry.

Especially after I heard what a bad veteran he was.

I was being a great president and wanted to keep being a great president.

I decided to beat him.

Karl and Dick helped a lot but I also helped too.

I beat Kerry without losing first.

This felt good.

## **Chapter 9**

Some people started saying that maybe Iraq wasn't decided.

This didn't make any sense.

Saddam was still dead.

We were still the winners.

But like I said already in Chapter 5 one thing I decided after September 11 was to stay decided.

So I did.

## **Chapter 10**

There were a bunch of decisions there for a while.

Some small, some big.

Some of them I remember like it was just a couple of years ago.

Others I don't remember as well.

I decided about water boarding.

I decided to accept responsibility for failures of the federal government after Katrina.

I stayed decided about stem cells.

I remained decided about global warming.

I kept deciding about taxes.

I did feel sad my decisions about social security couldn't actually become other peoples decisions.

We decided to keep on spending more to get to a smaller government.

## **Chapter 11**

The economy is an important to people.

I thought about the economy after watching womans volleyball at the Beijing Olympics.

It was really hot.

Some said the economy was getting worser and then the market dropped.

But it had dropped before and will drop again.

Like a volleyball.

I decided some stuff to help the economy.

I was starting to really look forward to no more meetings and being in Texas all the time.

## Chapter 12

I think being president for a long time has taught me a lot about deciding.

Always work with people who will decide like you decide.

Once you decided something, that's it. That's why they call it a decision.

Quick decisions are ones you make with not much time.

If you don't like what someone else has decided then you can always make your own decision.

This is the end of the book here.

You don't have to keep reading anymore.
